Step 2.1: General form information

What do you want to name your form?

This is the title of your form. It will appear in the frontend so it's better to choose a friendly name, such as "Contact Us" or "Enquiry Form".

How do you want to arrange your form? Inline 2 Lines 2 Columns Inline 2 Columns 2 Lines Inline (XHTML) 2 Lines (XHTML) Responsive CSS3

Choose a layout for your form. The layout will determine the appearance of your form's fields and caption. Click on any desired layout and the image will change showing you a small preview of the layout's arrangement.

XHTML layouts are created using CSS and XHTML (instead of the classic table format) and they are Web 2.0 ready. However, there is no visual difference for the end user (the form submitter).

Step 2.2: Emailing of results

Do you want to receive the results in your email? No Yes

Where do you want the results to be emailed?

If you want the submission results to be emailed to you, please fill the above field with a correct email address. If you leave it blank the submissions will still be visible in the "Manage Submissions" section.

Do you want to email a confirmation copy to the submitter? No Yes

Set this to "Yes" if you want the submitter to receive an email regarding the confirmation of his submission.

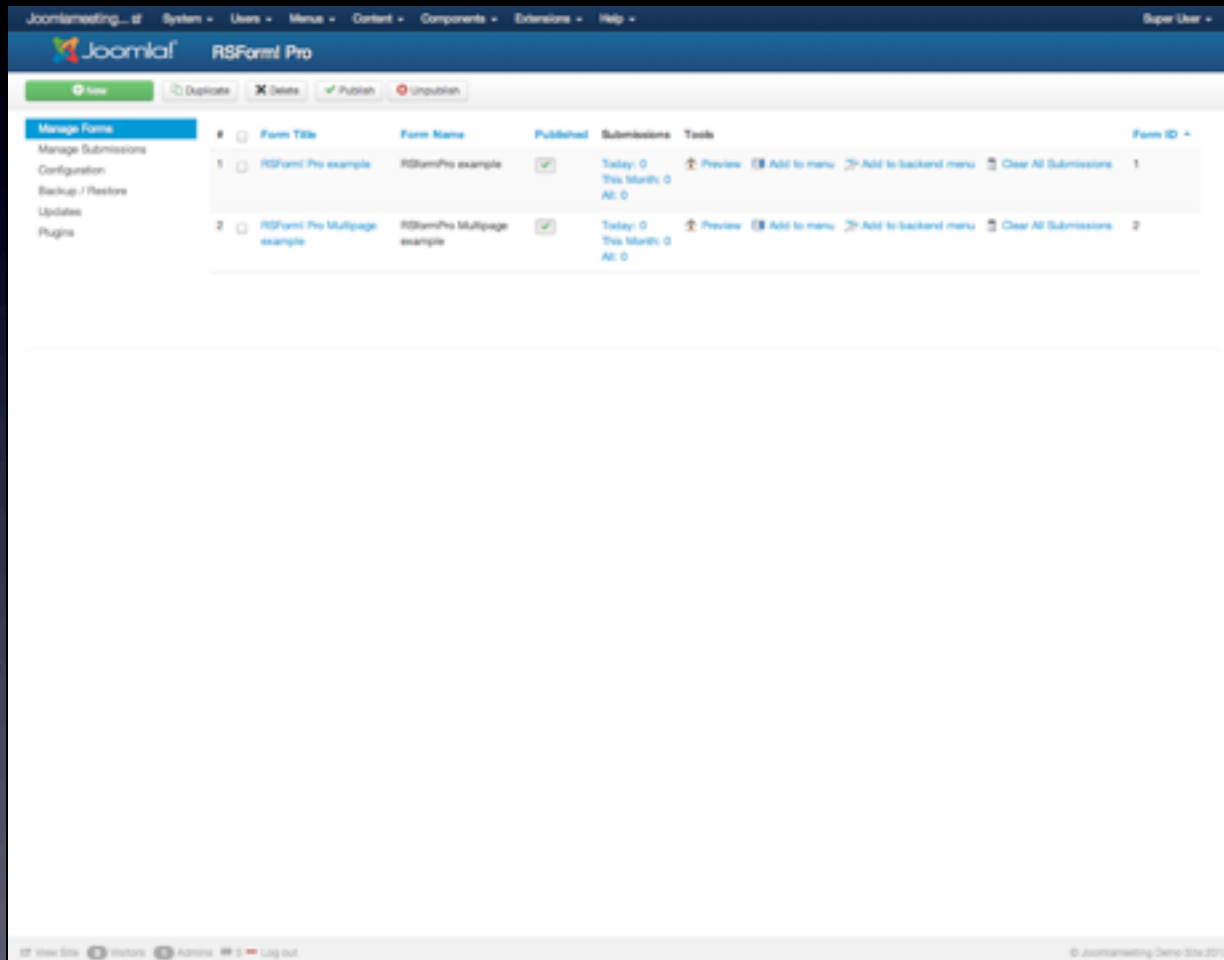

Step 2.3: Successful submission

What do you want to do after the form is successfully submitted?
