# What is ArticlesAnywhere?

NoNumber

Extensions for Joomla!

## Description

With Articles Anywhere you can place articles anywhere in your site, including within 3rd party components, modules and even inside other articles.

This can change the way you use your articles completely. For instance:

- Create custom modules displaying the article or articles you want.
- Create pages that show a number of defined articles
- Use an article as a content snippet, which you can include in multiple other articles/pages

The syntax is pretty simple.

You can, for instance, place the title and intro text of article 'My Article' in a Custom HTML module by simply placing:

```
{article My Article}{title} - {introtext}{/article}
```

Articles Anywhere comes with a handy editor button to help you insert the code you need.

*For more information see the [User Guide](#).*

# How Much Does it Cost?

There are two versions: Free and Pro

The image displays two side-by-side comparison tables. The left table compares 'Features' for 'Free' and 'Professional' versions. The right table compares 'Access & Support' for 'Free' and 'Professional' versions. A yellow sticky note is placed over the Professional column of the Features table, stating '30 day money back guarantee!'.

# Why Use it?

# How to Use

Using the WYSIWYG Editor add this:

```
{article Some article}...{/article}  
{article some-article}...{/article}  
{article 123}...{/article}
```

Some options are:

- `{text}` the entire text: introtext+fulltext
- `{readmore}` a read more link)
- `{url}` the url to the article)
- `{link}...{/link}` open and close tag to add a link of the article to any other text or tags
- `{introtext}`
- `{fulltext}` the text part below the read more bar
- `{id}`
- `{title}`
- or any other data available (must match the column name in the database)

Let's give it a try

# Recap

- ArticlesAnywhere allows you to be able to put articles in modules and other places in your Joomla! site
- Use the WYSIWYG editor, not HTML
- Go Pro to place multiple files and forum support
